

by Indiana Limestone Company

Formed centuries ago, Indiana Limestone veneers offer timeless accents and durability to your residential or commercial project. With a distinguished history, large inventory, and superior turnaround time, Indiana Limestone Company is able to guarantee consistent veneers to fit your needs.

Thin Sills

Indiana Limestone thin sills are rapidly becoming the product of choice for use with all types of natural and man-made stone veneers. Made from the same mill run quality Indiana Limestone, our thin stone sills provide the perfect finishing touch for any thin veneer project. Our thin veneer window sills come standard in a 2-1/4" course height, 3" or 4" depth, and 4' length. Full Color Blend and Gray thin sills are available in smooth, rocked, and rocked & dripped edges.

BENEFITS

100% natural Indiana Limestone, not cast or painted concrete

Starting at \$2.63/lineal foot, thin sills are less expensive than other competitive natural and man-made sill products

Four foot lengths have less joints, improve installation speed, and save on labor costs

Neutral color complements most natural and man-made veneer and can help eliminate the number of SKUs carried of other sill products
